EXERCISE 3

1 The cord snapped, she was still tied to the bungee cord with her ankles strapped together, so she was dragged under the water when the cord got caught. There were crocodiles in the river and the water was dirty. The paramedics got lost and then she was pulled out of the water by a man with no medical training. Her lungs had partially collapsed. She ended up in Zimbabwe without a passport.

2 She put her hands over her head so that her head was protected. The river was full after recent rain. She managed to dive down and free the rope. She wedged her arm between two rocks to stop being swept away. She knew enough first aid to put herself in the recovery position.
